PET Roll-on

The perfect solution to replace glass

PET Roll-on

The perfect solution to replace glass

Do you currently have or consider a glass roll-on because your brand requires a crystal-clear look? Are you also looking to reduce your carbon footprint? Then this PET roll-on is the perfect solution.

Lower Carbon Footprint

In anticipation of the decarbonization trend, Weener Plastics has developed a PET roll-on bottle for deodorants and antiperspirants. This sustainable development offers several advantages compared to glass roll-ons. The carbon footprint of the new design saves up to at least 35% CO₂ emissions, depending on the weight of the current glass roll-on. Additionally, the lightweight pack can be made of recycled material (rPET) and is better recyclable than a glass roll-on.

Smart Solution with Excellent Performance

This cost-effective 4-piece roll-on packaging concept provides advanced sealing properties and excellent pack tightness. The bottle is easily customizable and will be paired with our lightweight standard cap. This roll-on pack, with fully aligned tolerances, features a convenient opening and closing. The transparent PET bottle has a premium, high-quality glass look.

Unique Benefits

- Transparent, high-quality glass look or matt frosted look
- Cost-effective solution
- Excellent sealing and pack tightness
- Lightweight bottles and caps
- Carbon footprint saving up to more than 35%
- Full recyclability of the total pack; no incineration
- Convenient opening and closing
- Flexible bottle design

Specifications

- 4-piece concept: bottle, fitment, ball and screw cap
- Pilot tools for the 1.14" PET bottle
- Matt surface finish for the cap
- Matt or shiny surface finish for the bottle
- Material of the cap PP (rPP optional)
- Material of the bottle PET (rPET optional)
